About Us

Robotics is the best way for an aspiring engineer to learn the skills they need.

RoboSTEM Foundation Inc. is a 501(c)(3) nonprofit run entirely by students, empowering the next generation through robotics, engineering, and STEM education. We build accessible pathways for young learners in VEX Robotics with free online resources and software, low-cost hardware for competition use, hands-on experiences in workshops, and community programs. We impact over 23,000+ students globally every month.

Online Community

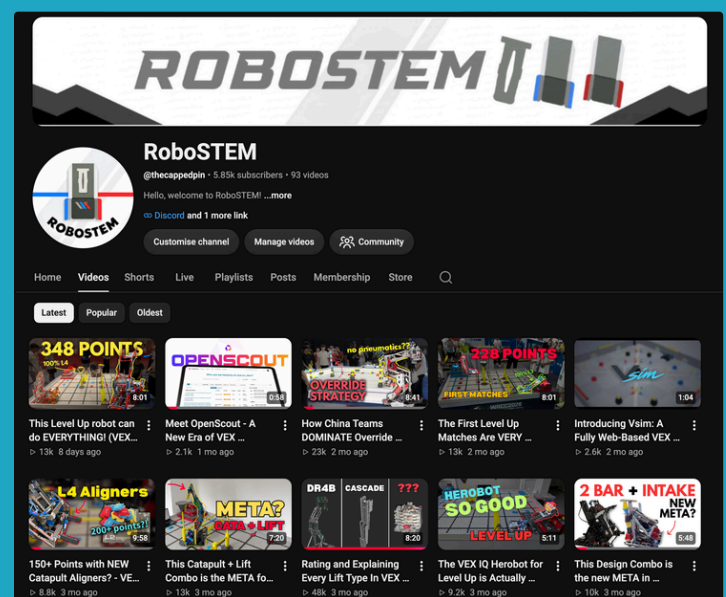

We operate a major YouTube channel and large, active online communities and forums.

Our Offerings

OpenScout

A desktop & mobile supported, high-quality VEX robotics scouting and statistics app. Built for the drive team and the pit alike.

- All competition statistics in one place
- Data you can't get from official apps
- Made for teams at a real competition

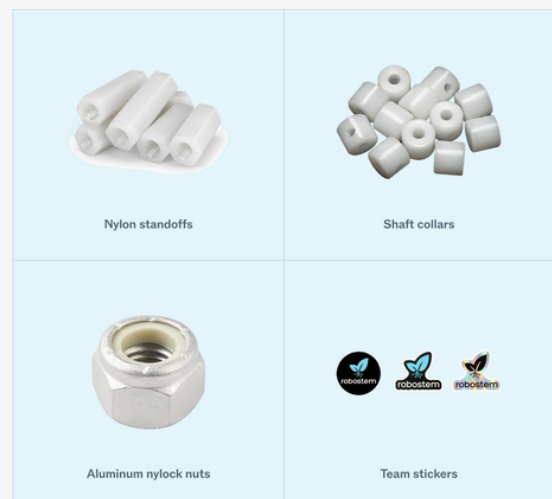

vSimulator

A fully web-based VEX robotics simulator with physics, Skills runs, leaderboards, practice mode and multiplayer. Drive a robot in the browser before you build one.

RoboSTEM Tech

Lightweight VEX-compatible hardware and cheap team merch, sold by us at shop.robostem.org. All proceeds are reinvested into robotics education, with ultra-low costs in both shipping and parts.

We sell plastic shaft collars, plastic spacers, aluminum nuts, and more to come.

Our Offerings

VEX IQ Tournaments

We host low-cost robotics tournaments for teams with the India Community Center, open to all teams in Elementary and Middle School. These decrease the financial gap for competition for teams at any level.

8-Week VEX IQ Workshops

We host 8-week VEX IQ workshops for individuals looking to greatly advance their skills in robotics at the ICC. Students start by building the Hero Bot and move towards designing their own bots for the 2026-27 game, Level Up.

5-Day VEX IQ Bootcamps

We host short-term VEX IQ bootcamps for students looking to jump right into robotics at the ICC. Students learn the principles of engineering while learning the concepts of the 2026-27 game, Level Up, and end each day on a scrimmage to get used to IQ competition.

Sponsorship Benefits

Platinum Tier Sponsorship

- ALL benefits in Gold Tier, and...
- Speakership opportunities at ALL RoboSTEM events
- Booth placement at ALL RoboSTEM events
- Access to monthly RoboSTEM Briefings on future plans
- Brand placement on all RoboSTEM software and hardware products

\$5,000+

Gold Tier Sponsorship

- ALL benefits in Silver Tier, and...
- Booth placement at RoboSTEM competitions
- Access to library of promotional photos and videos from events
- Promotion during opening ceremony and closing ceremony of ALL workshops and competitions

\$2,500+

Silver Tier Sponsorship

- Brand placement on promotional videos and in digital communities
- Promotion during opening ceremony of next workshops and competitions

\$500+
